

KIER P. REYES

Frontend Developer (React) | Full-Stack Project Experience

Manila, Philippines | 0977 170 3256 | Kierreyes007@gmail.com

github.com/kierreyes007-ux | linkedin.com/in/kier-reyes-dev | kierreyes.vercel.app

SUMMARY

Frontend developer with hands-on React.js experience building and deploying full-stack web applications. Comfortable connecting React frontends to Node.js/Express APIs, PostgreSQL databases, and third-party services like the Gemini and OpenAI APIs. Recent Computer Engineering Technology graduate looking to apply that range on a software development team.

SKILLS

- **Frontend:** React, JavaScript (ES6+), React Router, Context API, React Hooks, State Management, Tailwind CSS, HTML5, CSS3, Responsive Design
- **Backend & APIs:** Node.js, Express.js, REST API design & integration, CRUD operations
- **Databases:** PostgreSQL, MySQL, SQL, Supabase
- **Tools & Deployment:** Git, GitHub, Vercel, Render
- **Other:** Gemini API, OpenAI API, Microsoft Excel

PROJECTS

Full-Stack E-Commerce Application — *React.js | Tailwind CSS | Node.js | Express.js | PostgreSQL | Supabase*

- Built a full-stack storefront with product browsing, categories, product detail pages, and a shopping cart supporting variants (size, color) and quantity management.
- Built REST API endpoints in Express covering full CRUD on the cart: adding items, updating quantities, deleting items, and fetching current cart contents, plus read endpoints for product data, all connected to a PostgreSQL database via Supabase.
- Deployed the frontend on Vercel and the backend on Render, with React Router and Context API managing navigation and cart state across the app.

AI Chat Assistant — *React.js | Tailwind CSS | Node.js | Express.js | Gemini API*

- Built a chat interface with a Node/Express backend that integrates the Gemini API, keeping the API key and request logic server-side rather than exposed in the frontend.
- Added speech-to-text input and text-to-speech output using the browser's Web Speech and Speech Synthesis APIs, alongside loading and typing states for real-time feedback.
- Deployed the frontend on Vercel and the backend on Render as separate services communicating over REST.

Live demo: <https://kierreyes.vercel.app/projects/AI-assistance>

Expense Tracker — *React.js | JavaScript | Tailwind CSS*

- Built a React app for logging income and expenses, with add/edit/delete functionality and running balance calculations that update as transactions change.
- Managed all state on the frontend with React Hooks, with a responsive layout built in Tailwind CSS.

EXPERIENCE

Toyota Aisin Philippines — Production Intern

March 2025 – August 2025

- Analyzed production and quality-inspection data to identify defect patterns, reporting findings that informed process improvements.
- Documented inspection results and workflow metrics used by cross-functional teams to track compliance and efficiency.

EDUCATION

Technological University of the Philippines

2021 – 2025

Bachelor of Engineering Technology, Major in Computer Engineering Technology
